

TRITON SC

SINGLE CAB

MORE POWER, MORE SAFETY

NEW TOUGH AND RELIABLE SINGLE CAB

Rear Diff Lock

The Triton Single Cab's Rear Diff Lock aligns the rotational speed of the rear wheels, regardless of the available traction or differences in resistance at each wheel. This not only provides increased traction and control when driving over loose, muddy or rocky terrain, but because of the improved grip the Diff Lock provides, the Triton Single Cab won't slip or slide.

Interior

The Triton Single Cab's ergonomically designed dashboard combines practicality and full functionality with a modern luxury finish, so you'll never have to compromise on good looks or usability. Plus, the long-lasting vinyl used in its fabrication is incredibly hardwearing, a durable surface that resists scratches, nicks and scrapes.

Double Wall

Both the rear body and rear gate of the Triton Single Cab are double-walled, designed for increased strength and durability, so it'll last longer and load better.

2.4 MPI SC 4x2 (5-speed M/T) Petrol GL

2.4 MPI SC 4x2 (5-speed M/T) Petrol GLX

2.5 Di-DC SC 4x2 (5-speed M/T) Diesel GLX
